## SUPPORTING DOCUMENT

Title 241-TY TANK FARM EFFLUENT MONITORING PLAN	Number SD- WM-EMP-012	Rev. No. 0	Page A
Key Words Effluent, Monitoring	Author A.T. Alstad Signature 13331 Organization Code		

## Abstract

The 241-TY Tank Farm Effluent Monitoring Plan was prepared to identify gas, liquid, and/or solid effluent streams for which monitoring is required. The information presented in this effluent monitoring plan is based upon available data in reports, procedures, etc., which pertain to the six single-shell tanks in TY Tank Farm. The analytical results of vapor space samples previously taken from three tanks in 241-TY Tank Farm were used to predict radionuclide levels in the gaseous effluent streams from the tanks. These levels were found to be less than the levels listed in RHO-MA-139, Environmental Protection Manual, which require monitoring and sampling; therefore, an Effluent Monitoring Plan for 241-TY Tank Farm is not a regulatory requirement at this time.

## 241-TY TANK FARM EFFLUENT MONITORING PLAN

### INTRODUCTION

The 241-TY Tank Farm Effluent Monitoring Plan was prepared in response to Draft DOE Order 5400.1 (reference 13) (initially identified as DOE Order 5480.12), General Environmental Protection Program Requirements. The purpose of this plan is to evaluate all gaseous, liquid and solid effluent streams specific to the 241-TY Tank Farm and assess their potential for release of radioactive and nonradioactive pollutants. Effluent streams and their sources; stream characteristics and constituents; regulatory requirements; and monitoring, sampling, and analytical strategies are presented in this effluent monitoring plan. The information herein is based upon available data in reports, procedures, etc., which pertain to the six single-shell tanks in the tank farm.

### SUMMARY

Only two types of waste effluents are generated from the inactive TY Tank Farm. These are gaseous and solid waste. There are no liquid waste effluent streams discharged from the facility into the environment. Solid waste is generated through normal tank farm activities (i.e. routine maintenance and occasional operation) and consists of such items as trash, broken tools, plastic sheets, torn and nonrepairable protective clothing, etc. The nature of the waste is normally one of low-level radioactive contamination, and following proper packaging and radiological survey practices, is disposed of in designated burial grounds. The vapor spaces of the underground storage tanks are passively ventilated to the atmosphere via vents equipped with high efficiency particulate air (HEPA) filters, also known as breather filter vents. These vents allow air to move either into or out of the tanks depending upon the relation of tank vapor space pressure to atmospheric pressure.

The breather filter vents are not currently monitored or sampled on a routine basis. Vapor space air sampling activities were conducted in the past in an attempt to identify the radionuclide concentrations in the effluent streams of inactive single-shell tanks. The sampling performed in the 241-TY Tank Farm, however, was not all inclusive in that only three of the six tanks air spaces were actually sampled. This approach was based on the assumption that the radionuclide concentrations of the vapor spaces in the remaining tanks could be predicted from the analytical results of the collected samples. These results are also the basis for determining the need for monitoring and sampling of the effluent streams addressed in this plan. The resulting radionuclide concentrations were found to be less than the levels listed in RHO-MA-139, Environmental Protection Manual, for which gaseous effluent monitoring and sampling are required.

Although routine monitoring and sampling are not required at this time, there does appear to be a need for a more complete and confident radionuclide characterization of the storage tank vapor space.

## I. GENERAL INFORMATION

241-TY TANK FARM/200 WEST AREA      TANK 241-TY-101 THROUGH TY-106  
(Facility/Location)      BREATHING VENTS  
Stream Code: None      Type of Waste: Gas  
(EP Designation)      (Gas, Liquid, Solid)  
Type of Release: N/A

**GENERAL DESCRIPTION:** Tanks 241-TY-101 through TY-106 are single-shell storage tanks containing mixed waste to which no new additions are made. Airborne radionuclides are filtered from the tank atmosphere by the high efficiency particulate air (HEPA) filter in response to changes in atmospheric conditions.

**DISCHARGE INFORMATION:** Annual Volume Not measured      Normal Flow Not measured  
Discharged to Atmosphere      Official Site ID None assigned  
Discharge Site Location 200 West Area      Discharge Site Coordinates (reference 1) N42500 (North) W75902 (West)  
**MONITOR:** Radiation None      Nonradiation None  
**SAMPLER:** Type None      Constituents N/A

**EMERGENCY ACTION:** HEPA breather filters are replaced when they fail. During the time required to change the failed filter element, the manual tank isolation valve is closed.

**Description:** Each HEPA breather filter is given the dioctylphthalate (DOP) test on a scheduled basis by Ventilation Air Balance Unit personnel (reference 3). If any filter fails the DOP test, it is replaced according to procedure (reference 4).

**HISTORICAL COMPARISON DATA:** Although a specific air sampling program of the vapor space, within all of the tanks has never been performed, contamination levels within the effluent streams passing through the HEPA filters were judged to be within the DCG guidelines stated in RHO-MA-139, based upon studies of single-shell tank farms (reference 2).

## II. EFFLUENT STREAM OPERATING PARAMETERS

241-TY TANK FARM/200 WEST AREA      ALL TY-TANK BREATHER VENTS  
(Facility/Location)      (Effluent Stream)

Stream Code: None      Type of Waste: Gas  
(EP Designation)      (Gas, Liquid, Solid)

## NORMAL OPERATING PARAMETERS FOR STREAM:

UNDER NORMAL CONDITIONS, SMALL AMOUNTS OF GAS ENTER AND LEAVE THE TANKS DUE TO CHANGES IN ATMOSPHERIC PRESSURE. THESE GASES FLOW THROUGH A HEPA BREATHER FILTER. THE GASES DISCHARGED THROUGH THE FILTER ARE NOT MONITORED ON A REGULAR BASIS.

<u>Parameter</u>	<u>Unit of Measure</u>	<u>Parameter Range</u>	<u>Monitor ID</u>	<u>Ref. No.</u>
		<u>Low</u> <u>High</u>		

NOTE: THERE ARE NO PROVISIONS ON THE HEPA BREATHER FILTERS ON EACH OF THE TANKS TO ALLOW MEASUREMENT OF THE EFFLUENT STREAM PARAMETERS. HOWEVER, THE NORMAL AIR FLOW RATE THROUGH EACH HEPA FILTER IS ESTIMATED TO BE 0.1 CFM (reference 5, pp. 9-12).

## III. SPECIFIC CONTRIBUTORS

241-TY TANK FARM/200 WEST AREA      ALL TY-TANK BREATHER VENTS

## VIIa. CONTRIBUTOR RISK ANALYSIS

<u>241-TY TANK FARM/200 WEST AREA</u> (Facility/Location)	<u>ALL TY-TANK BREATHER VENTS</u> (Effluent Stream)
Stream Code <u>None</u> (EP Designation)	Type of Waste <u>Gas</u> (Gas, Liquid, Solid)
Contributor <u>Tank Vapor Space</u>	Specific I.D. <u>None</u>

## POTENTIAL FOR RELEASE:

<u>Continuous Release Stream</u>	<u>Relative Release Factor</u>
Design permits direct discharge to effluent stream	10/design, 7/lock out 1/isolated <u>18*</u> *reference 5, page B-5
Contributor monitored prior to discharge to effluent stream	1/auto, 3/manual,
Automatic/manual-shutdown/recycle/diversion	10/none <u>10</u>
	RELEASE FACTOR <u>28</u>

## UPSET SCENARIO:

NO CREDIBLE INCIDENT HAS BEEN IDENTIFIED WHICH WOULD UPSET THE INDIVIDUAL TANK VAPOR SPACES AND CAUSE RELEASES. THE UPSET SCENARIOS WHICH PERTAIN TO THESE TANKS ARE (1) BREACH OF THE HEPA FILTERS, AND (2) LOSS OF FLUID IN THE OIL SEAL LOOPS. REFERENCE 5, PAGES 9-6 THROUGH 9-12, PROVIDES A DISCUSSION OF EACH OF THESE POTENTIAL UPSETS.

## RISK FACTOR FOR CONTRIBUTOR:

THIS SECTION CANNOT BE COMPLETED FOR THESE TANKS BECAUSE SAMPLE RESULTS DATA REQUIRED ON FORM I AND FORM III DO NOT EXIST.

## VIIb. EFFLUENT STREAM RISK ANALYSIS

<u>241-TY TANK FARM/200 WEST AREA</u> (Facility/Location)	<u>ALL TY-TANK BREATHER VENTS</u> (Effluent Stream)
Stream Code <u>None</u> (EP Designation)	Type of Waste <u>Gas</u> (Gas, Liquid)

## EFFLUENT STREAM RISK ANALYSIS:

<u>Constituent</u>	<u>Contributor</u>	<u>Effluent % Concentration Limit</u>	<u>Contributor Flow to Exceed Limit (gpm)</u>	<u>Comments</u>	<u>Ref. No.</u>
--------------------	--------------------	---	---	-----------------	---------------------

OF THE TWO EVENTS DISCUSSED IN "UPSET SCENARIO", FORM VIIa, LOSS OF THE OIL SEAL LOOP FLUID WAS CONSIDERED TO BE THE WORST PROBABLE OCCURRENCE WITH AN ANTICIPATED FREQUENCY OF ONE EVENT PER YEAR. THE RISK WAS JUDGED TO BE ACCEPTABLE (REFERENCE 5, pp 9-12). RELEASES FOLLOWING LOSS OF THE OIL SEAL LOOP FLUID WERE CALCULATED FOR TY-102, -104 AND -105, AND THIS INFORMATION IS PRESENTED ON FORM VI FOR EACH OF THESE TANKS.

## VIII. MONITORING STRATEGY

241-TY TANK FARM/200 WEST AREA  
(Facility/Location)241-TY-101, -103, AND -106  
BREATHING VENTS  
(Effluent Stream)Stream Code None  
(EP Designation)Waste Type Gas  
(Gas, Liquid, Solid)

MONITOR REQUIRED: REGULATORY REQUIREMENTS (FORM VI) HAVE NOT BEEN DETERMINED BECAUSE OF INSUFFICIENT DATA AS TO SPECIFIC CONSTITUENTS. VAPOR SPACE SAMPLING IN EACH OF THE TANKS WILL BE REQUIRED PRIOR TO THE MONITOR DETERMINATION.

Constituent	Contributor (% Concentration Limit)			
	Highest Risk		Lowest Risk	
	/LR*	/LR	/LR	/LR

\*Leak Rate

MONITORING CAPABILITY: THIS SECTION IS NOT APPLICABLE. REGULATORY REQUIREMENTS HAVE NOT BEEN DETERMINED BECAUSE OF INSUFFICIENT DATA AS TO SPECIFIC CONSTITUENTS. VAPOR SPACE SAMPLING IN EACH OF THE TANKS WILL BE REQUIRED PRIOR TO MONITORING CAPABILITY DETERMINATION.

Monitorable Constituent	Contribution	Concentration and Unit	Required Detection Limits	Monitor Range Low / High	Contributor Leak Rate Detection Limits	Ref. No.
----------------------------	--------------	---------------------------	---------------------------------	-----------------------------	--	-------------

MONITORING STRATEGY: THIS SECTION IS NOT APPLICABLE BECAUSE NO MEANS OF MONITORING THE TANKS HAVE BEEN PROVIDED.

Monitored Parameter	Determine Contributor Source	Equivalent Sum (% of limit)	Alarm Setpoint Ref. No.	Consensus Standard Ref. No.	WHC Ref. No.

## IX. SAMPLING STRATEGY

<u>241-TY TANK FARM/200 WEST AREA</u> (Facility/Location)	<u>TANKS 241-TY-101, -103, AND -106</u> <u>BREATHING VENTS</u> (Effluent Stream)
Stream Code <u>None</u> (EP Designation)	Type of Waste <u>Gas</u> (Gas, Liquid)

SAMPLING REQUIRED: THIS SECTION IS NOT APPLICABLE FOR THESE TANKS. VAPOR SPACE SAMPLING IN EACH OF THE TANKS WILL BE REQUIRED BEFORE THE NEED FOR ADDITIONAL SAMPLING AT THE TANK BREATHING VENTS IS ESTABLISHED.

<u>Constituent</u>	<u>Required Detection Limits</u>	<u>Contributor</u>			
		<u>Highest Risk</u>		<u>Lowest Risk</u>	
		<u>/ LR*</u>	<u>/ LR</u>	<u>/ LR</u>	<u>/ LR</u>

\*Leak Rate.

SAMPLING NEEDS: THIS SECTION IS NOT APPLICABLE FOR THESE TANKS BECAUSE THE INFORMATION NECESSARY TO DETERMINE SAMPLING NEEDS DOES NOT EXIST.

<u>Constituent</u>	<u>Contributor Source</u>	<u>Type Sampler</u>	<u>Minimum Sampled Spill</u>	<u>Reg. Ref. No.</u>	<u>Consensus Standard Ref. No.</u>	<u>WHC Ref. No.</u>	<u>Strategy Ref. No.</u>
--------------------	-------------------------------	-------------------------	--------------------------------------	------------------------------	--	-----------------------------	------------------------------

## IX. Sampling Strategy (continued)

<u>241-TY TANK FARM/200 WEST AREA</u> (Facility/Location)	<u>TANK 241-TY-102 BREATHER VENT</u> (Effluent Stream)
Stream Code <u>None</u> (EP Designation)	Type of Waste <u>Gas</u> (Gas, Liquid)

SAMPLING REQUIRED: BASED UPON FORM VI, NO SAMPLING IS REQUIRED FOR THIS TANK.

Constituent	Required Detection Limits	Contributor			
		Highest Risk		Lowest Risk	
		/ LR*	/ LR	/ LR	/ LR
Total Alpha	---	0.0155%	--	--	0.039%
Total Beta	---	0.0073%	--	--	0.018%

\*Leak Rate.

SAMPLING NEEDS: SAMPLING THE EFFLUENT STREAM ON THIS TANK DOES NOT APPEAR NECESSARY.

<u>Constituent</u>	<u>Contributor Source</u>	<u>Type Sampler</u>	<u>Minimum Sampled Spill</u>	<u>Reg. Ref. No.</u>	<u>Consensus Standard Ref. No.</u>	<u>WHC Ref. No.</u>	<u>Strategy Ref. No.</u>
--------------------	-------------------------------	-------------------------	--------------------------------------	------------------------------	--	-----------------------------	------------------------------

## IX. Sampling Strategy (continued)

<u>241-TY TANK FARM/200 WEST AREA</u> (Facility/Location)	<u>TANK 241-TY-104 BREATHER VENT</u> (Effluent Stream)
Stream Code <u>None</u> (EP Designation)	Type of Waste <u>Gas</u> (Gas, Liquid)

SAMPLING REQUIRED: BASED UPON FORM VI, NO SAMPLING IS REQUIRED FOR THIS TANK.

Constituent	Required Detection Limits	Contributor			
		Highest Risk		Lowest Risk	
		/ LR*	/ LR	/ LR	/ LR
Total Alpha	---	4.5%	--	--	11.0%
Total Beta	---	0.13%	--	--	0.32%
Sr-90	---	0.011%	--	--	0.027%
Pu-239	---	0.0053%	--	--	0.0133%

\*Leak Rate.

SAMPLING NEEDS: SAMPLING THE EFFLUENT STREAM ON THIS TANK DOES NOT APPEAR NECESSARY.

<u>Constituent</u>	<u>Contributor Source</u>	<u>Type Sampler</u>	<u>Minimum Sampled Spill</u>	<u>Reg. Ref. No.</u>	<u>Consensus Standard Ref. No.</u>	<u>WHC Ref. No.</u>	<u>Strategy Ref. No.</u>
--------------------	-------------------------------	-------------------------	--------------------------------------	------------------------------	--	-----------------------------	------------------------------

## IX. Sampling Strategy (continued)

<u>241-TY TANK FARM/200 WEST AREA</u> (Facility/Location)	<u>TANK 241-TY-105 BREATHER VENT</u> (Effluent Stream)
Stream Code <u>None</u> (EP Designation)	Type of Waste <u>Gas</u> (Gas, Liquid)

SAMPLING REQUIRED: BASED UPON FORM VI, NO SAMPLING IS REQUIRED FOR THIS TANK.

Constituent	Required Detection Limits	Contributor			
		Highest Risk		Lowest Risk	
		/ LR*	/ LR	/ LR	/ LR
Total Beta	---	2.4%	--	--	0.61%
Cs-137	---	0.0003%	--	--	0.0007%
Sr-90	---	0.22%	--	--	0.50%

\*Leak Rate.

SAMPLING NEEDS: SAMPLING THE EFFLUENT STREAM ON THIS TANK DOES NOT APPEAR NECESSARY.

<u>Constituent</u>	<u>Contributor Source</u>	<u>Type Sampler</u>	<u>Minimum Sampled Spill</u>	<u>Reg. Ref. No.</u>	<u>Consensus Standard Ref. No.</u>	<u>WHC Ref. No.</u>	<u>Strategy Ref. No.</u>
--------------------	-------------------------------	-------------------------	--------------------------------------	------------------------------	--	-----------------------------	------------------------------

## X. ANALYSIS STRATEGY

241-TY TANK FARM/200 WEST AREA  
(Facility/Location)

Tank 241-TY-102, -104, and -105  
BREATHING VENTS  
(Effluent Stream)

Stream Code None  
(EP Designation)

Waste Type Gas  
(Gas, Liquid, Solid)

ANALYSIS REQUIRED: ANALYSIS STRATEGY FOR THESE TANKS IS NOT REQUIRED BECAUSE SAMPLING  
THE EFFLUENT STREAMS, FORM VI, IS NOT REQUIRED.

<u>Constituent</u>	<u>Major Contributor to Effluent</u>	<u>Trigger for Analysis</u>	<u>Analysis Method</u>	<u>Detectable Limit</u>	<u>Reg. Limit</u>	<u>Standard Method</u>	<u>Comparison Program</u>	<u>Certification Requirement</u>
--------------------	--	---------------------------------	----------------------------	-----------------------------	-----------------------	----------------------------	-------------------------------	--------------------------------------

## X. Analysis Strategy (continued)

241-TY TANK FARM/200 WEST AREA  
(Facility/Location)Tank 241-TY-101, -103, and -106  
BREATHING VENTS  
(Effluent Stream)Stream Code None  
(EP Designation)Waste Type Gas  
(Gas, Liquid, Solid)ANALYSIS REQUIRED: THIS SECTION CANNOT BE COMPLETED AT THIS TIME FOR THESE TANKS. SAMPLING REQUIREMENTS  
(SEE FORM IX) HAVE NOT YET BEEN DETERMINED.

<u>Constituent</u>	<u>Major Contributor to Effluent</u>	<u>Trigger for Analysis</u>	<u>Analysis Method</u>	<u>Detectable Limit</u>	<u>Reg. Limit</u>	<u>Standard Method</u>	<u>Comparison Program</u>	<u>Certification Requirement</u>
--------------------	--------------------------------------	-----------------------------	------------------------	-------------------------	-------------------	------------------------	---------------------------	----------------------------------

## XI. SCHEDULES, RECORDS, AND REPORTS

<u>241-TY TANK FARM/200 WEST AREA</u> (Facility/Location)	<u>ALL TY-TANK BREATHER VENTS</u> (Effluent Stream)
Stream Code <u>None</u> (EP Designation)	Type of Waste <u>Gas</u> (Gas, Liquid)

ALTHOUGH NO GASEOUS EFFLUENT STREAMS FOR WHICH MONITORING, SAMPLING, AND ANALYSIS HAVE BEEN IDENTIFIED, INFORMATION ON THIS FORM PERTAINS TO THE FILTERS ON THE BREATHER VENTS.

## SCHEDULES:

	<u>Requestor</u>	<u>Responsible Section</u>	<u>Ref. No.</u>
Sampling and Analysis			
Process

**241-TY TANK FARM  
EFFLUENT MONITORING PLAN**

**LIQUID WASTE EFFLUENT SECTION**

\*\*\*\*\*

THE SIX TANKS IN 241-TY TANK FARM ARE INACTIVE WASTE STORAGE TANKS. BECAUSE NO NEW WASTE ADDITIONS MADE, THERE ARE NO LIQUID EFFLUENTS (REFERENCE 6, PARAGRAPH 13.2.2, PAGE 13). FOR THIS REASON, A MONITORING PLAN FOR LIQUID EFFLUENTS DOES NOT APPLY.

**241-TY TANK FARM  
EFFLUENT MONITORING PLAN**

**SOLID WASTE EFFLUENT SECTION**

\*\*\*\*\*

NORMAL ACTIVITIES IN 241-TY TANK FARM, WHICH ARE MOST FREQUENTLY MAINTENANCE AND OCCASIONALLY OPERATIONS, GENERATE SMALL AMOUNTS OF SOLID WASTE MATERIAL THAT ARE NOT REUSABLE. THIS MATERIAL CONSISTS OF SUCH ITEMS AS TRASH, BROKEN TOOLS, PLASTIC SHEETS, TORN AND NON-REPAIRABLE PROTECTIVE CLOTHING, CARDBOARD BOXES, ETC. THE WASTE HAS LOW-LEVEL CONTAMINATION, IS PROPERLY PACKAGED, AND THEN MONITORED BY A RADIOLOGICAL PROTECTION TECHNICIAN, IN ACCORDANCE WITH APPLICABLE PROCEDURES (REFERENCE 8 IS A TYPICAL PROCEDURE). WHEN ALL PROVISIONS OF A GOVERNING PROCEDURE HAVE BEEN MET, THE WASTE IS RELEASED AND TRANSPORTED TO APPROPRIATE HANFORD SITE BURIAL GROUNDS.

**IMPACT LEVEL CHECKLIST (Sheet 2 of 2)**

	<u>Impact Level</u>	<u>Yes</u>	<u>No</u>
12. Activity requires documented verification of conformance to requirements involving replacement of sub-assemblies or parts with qualified spares, or involving changes to safety-related hardware, equipment, or components which have not been identified as Impact Level 1 or 2.	3	[ ]	[ ]
13. Activity involves projects, programs, equipment, components, systems, or hazardous materials which have an impact on industrial safety, industrial hygiene, fire protection, waste management, radiological monitoring or involve compliance with National Fire Protection Association (NFPA) or Uniform Building Code (UBC) code requirements.	3	[ ]	[ ]
14. Activity deals with protective maintenance features, or with the fabrication, installation, or modification of equipment or systems using commercial grade parts* or catalog items where their application does not affect the mission or safety functions.	4	[ ]	[ ]
15. Activity deals with requisition preparation and the development of specifications for the procurement and use of commercial parts or catalog items requiring no receiving inspection.	4	[ ]	[ ]
16. Activity deals with packages for field work on commercial parts, equipment, hardware, or catalog items involving negligible safety hazards.	4	[ ]	[ ]
17. Activity deals with an approved change to correct a design problem identified during protective maintenance, modification, or other field work on commercial parts, equipment, hardware, or catalog items.	4	[ ]	[ ]
18. Activity deals with editorial changes to approved engineering, administrative, or technical documents.	4	[ ]	[ ]
19. Other activities which have not been identified as Impact Level 1, 2, or 3.	4	[X]	[ ]

\*The Impact Level of commercial grade items (Paragraph 2.2) is normally 4 and should not be upgraded unless extraordinary circumstances warrant.
